

# RealifyProperties.com

Realify Properties is a boutique Real Estate Agency that needed a new website and online marketing strategy. Their main goals were to establish the Realify brand and attract new clients and Real Estate agents.

Realify Properties hired Smart Bee Social for the job. The end result was a professional, mobile responsive and easy to maintain website that showcases the Realify personality and tells their story to potential clients and agents.

## Client Testimonial

"Mara was great to work with while building our new website. She was very responsive and easy to communicate with. She worked hard to first understand our business, then use the website to tell the Realify story in a way that illustrates how we're unique. I love our new website and would highly recommend Smart Bee Social to anyone."
